Average Energy Prices, Los Angeles-Long Beach-Anaheim – February 2020

Gasoline prices averaged \$3.535 a gallon in the Los Angeles-Long Beach-Anaheim area in February 2020, the U.S. Bureau of Labor Statistics reported today. Assistant Commissioner for Regional Operations Richard Holden noted that area gasoline prices were higher than last February when they averaged \$3.315 per gallon. Los Angeles area households paid an average of 19.3 cents per kilowatt hour (kWh) of electricity in February 2020, higher than the 18.3 cents price per kWh paid in February 2019. The average cost of utility (piped) gas at \$1.252 per therm in February was similar to the \$1.260 per therm spent last year. (Data in this release are not seasonally adjusted; accordingly, over-the-year-analysis is used throughout.)

At \$3.535 a gallon, Los Angeles area consumers paid 39.7 percent more than the \$2.530 national average in February 2020. A year earlier, consumers in the Los Angeles area paid 37.4 percent more than the national average for a gallon of gasoline. The local price of a gallon of gasoline has ranged from 23.9 to 39.7 percent above the national average in the month of February during the past five years. (See [chart 1.](#))

The 19.3 cents per kWh Los Angeles households paid for electricity in February 2020 was 44.0 percent more than the nationwide average of 13.4 cents per kWh. Last February, electricity costs were 34.6 percent higher in Los Angeles compared to the nation. In the past five years, prices paid by Los Angeles area consumers for electricity exceeded the U.S. average by 34.1 percent or more in the month of February. (See [chart 2.](#))

Prices paid by Los Angeles area consumers for utility (piped) gas, commonly referred to as natural gas, were \$1.252 per therm, 19.2 percent more than the national average in February 2020 (\$1.050 per therm). A year earlier, area consumers paid 19.9 percent less per therm for natural gas compared to the nation. In the Los Angeles area over the past five years, the per therm cost for natural gas in February has varied between 6.6 percent and 28.7 percent above the U.S. average. (See [chart 3.](#))

The Los Angeles-Long Beach-Anaheim metropolitan area consists of Los Angeles and Orange Counties in California.

Technical Note

Average prices are estimated from Consumer Price Index (CPI) data for selected commodity series to support the research and analytic needs of CPI data users. Average prices for electricity, utility (piped) gas, and gasoline are published monthly for the U.S. city average, the 4 regions, 9 divisions, 2 population size classes, 8 region/size-class cross-classifications, and the 23 largest local index areas. For electricity, average prices per kilowatt-hour (kWh) are published. For utility (piped) gas, average prices per therm, are published. For gasoline, the average price per gallon is published. Average prices for commonly available grades of gasoline are published as well as the average price across all grades.

All eligible prices are converted to a price per normalized quantity. These prices are then used to estimate a price for a defined fixed quantity. The average price per kilowatt-hour represents the total bill divided by the kilowatt-hour usage. The total bill is the sum of all items applicable to all consumers appearing on an electricity bill including, but not limited to, variable rates per kWh, fixed costs, taxes, surcharges, and credits. This calculation also applies to the average price per therm for utility (piped) gas.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200; Federal Relay Service: 800-877-8339.

Table 1. Average prices for gasoline, electricity, and utility (piped) gas, Los Angeles-Long Beach-Anaheim and the United States, February 2019 - February 2020, not seasonally adjusted

	Gasoline per gallon		Electricity per kWh		Utility (piped) gas per therm	
	Los Angeles area	United States	Los Angeles area	United States	Los Angeles area	United States
